

OVERVIEW OF OUR ENGINE BUILDS

- Clarke is unique in that we are the only global company dedicated to the provision of diesel engine drivers designed and manufactured exclusively for the fire protection market
- Clarke works in partnership with our global customers to develop engine builds specific to their unique country requirements
- Clarke designs, develops, tests and manufactures fire pump engines at our dedicated engine facilities in the UK and USA
- Clarke is a specialist manufacturer of Engineered Diesel Systems tailored to our customers global standards

UL-FM CLARKE DIESEL SYSTEM

*This is an example of a Clarke DQ6H engine built to a UL-FM specification

Performance Charge Air Cooler

Clarke has developed these Air Coolers to provide high performance whilst still maintaining reliability and the effective use of cooling water.

Optimized Heat Exchanger

Our Heat Exchangers are designed to operate at the highest efficiency in order to reduce cooling water consumption.

Installation Ready Legs

We supply our engines with purpose built legs to allow ease of installation at site.

DQ6H ENGINE SERIES

DQ6H-UFKA48 DQ6H-UFKA60
DQ6H-UFKA4G DQ6H-UFKA88
DQ6H-UFKA50 DQ6H-UFKA98

The engine illustrated above is one example from the Clarke range. Please view our 'Products Section' or contact us to discuss our full engine range
